EDUCATION

Manipal University Jaipur

B.Tech. in Computer Science & Engineering

- CGPA: 7.53 / 10

Jaipur, India

2024 – Present

PROJECTS

GPU & Resource Management System for Academic Laboratories

Nov 2025 – Jan 2026

- Contributed to the design of a centralized system for managing GPU and laboratory resources in an academic environment.
- Designed database schemas and collections for users, resource requests, usage logs, and audit records.
- Worked with JWT-based authentication flow and role-based access control concepts used in the system.
- Supported allocation logic including quota enforcement, conflict detection, and automatic deallocation.
- Ensured data consistency and traceability through structured logging and audit-focused data modeling.

Car Rental Management System | C++, Object-Oriented Programming

Aug 2025 – Dec 2025

- Developed an object-oriented car rental management system using C++.
- Applied abstraction, inheritance, encapsulation, and polymorphism in system design.
- Implemented booking, rental, return processing, and vehicle availability tracking.
- Designed class hierarchies for Manager, Employee, and Customer roles.

Academic Course Registration & Performance Tracking System

Aug 2025 – Dec 2025

- Designed a relational database schema using MySQL for students, courses, enrollments, and grades.
- Implemented normalized tables with primary keys and foreign key relationships.
- Wrote SQL queries for GPA calculation, enrollment statistics, and performance analysis.
- Modeled selected datasets in MongoDB to compare relational and document-based database design.

ACADEMIC & TECHNICAL ENGAGEMENT

- Actively engaged in lab work and course-based projects across core computer science subjects.
- Applied database design, SQL querying, and normalization concepts in academic assignments.
- Participated in team-based development, contributing to requirement analysis and data modeling.
- Reviewed and tested peer implementations to validate correctness and data consistency.

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, JavaScript

Web Technologies: HTML, CSS, React.js, REST APIs

Databases: MySQL, MongoDB, Oracle SQL, PL/SQL

Core Concepts: Object-Oriented Programming, DBMS, Data Structures and Algorithms

RELEVANT COURSEWORK

Data Structures and Algorithms, Design and Analysis of Algorithms,
Computer Organization and Architecture, Operating Systems, Cryptography,
Automata Theory, Compiler Design, Object-Oriented Programming, RDBMS

CERTIFICATIONS & PROFESSIONAL COURSEWORK

Oracle Database Foundations

Oracle Database Design

Oracle PL/SQL Programming
