EDUCATION

B.Tech, Computer Science & Engineering — Manipal University Jaipur, India 2024 – Present

CGPA: 7.53 / 10

SKILLS

Languages: C++, Java, Python, JavaScript

Web: HTML, CSS, React.js, REST APIs

Backend/Tools: FastAPI, Node.js (Basic), JWT Auth, API Design

Databases: MySQL, MongoDB, Oracle SQL, PL/SQL, RDBMS

Core CS: Data Structures & Algorithms, DBMS, Operating Systems, OOP, DAA

PROJECTS

SmartApply | AI Internship & Job Application Assistant

- Built a full-stack system to aggregate internships from multiple sources and rank them via skill-based matching
- Implemented multi-page web scraping with link validation (200-check), deduplication, and retry handling
- Designed a matching engine using weighted scoring ($\geq 60\%$ threshold) with explainable “match reasons”
- Developed browser automation (Playwright) for safe autofill of applications (manual submit control)
- Added fallback cover letter generator (offline + AI-optional) to avoid API dependency failures

Tech: Python (FastAPI), Playwright, BeautifulSoup, HTTPX

GPU & Resource Management System

- Designed centralized allocation system for GPUs/lab resources with quota enforcement and conflict detection
- Modeled schemas for users, requests, logs, and audits; ensured traceability and data consistency
- Implemented JWT-based authentication and role-based access control

Car Rental Management System | C++ OOP

- Applied OOP principles (abstraction, inheritance, polymorphism) to manage bookings and inventory
- Implemented role-based classes (Manager, Employee, Customer) and availability tracking

Course Registration & Performance System

- Designed normalized MySQL schema; wrote queries for GPA, enrollment stats, and analytics
- Compared relational vs. NoSQL (MongoDB) data modeling

Weather Forecasting Web App

- Built responsive UI (HTML/CSS/JS) and integrated external APIs for real-time data rendering

COURSEWORK

Data Structures & Algorithms, Design & Analysis of Algorithms, Operating Systems, DBMS/RDBMS, Computer Organization, Automata Theory, Compiler Design, Cryptography

CERTIFICATIONS

Oracle Database Foundations | Oracle Database Design | Oracle PL/SQL Programming
